Summary	
No. of Feedback taken	240
Session	2022-23

Remarks (if any) (Recommendations)	Action Taken
Coding must be taught efficiently with live demo and should be given utmost priority.	<ol style="list-style-type: none"> 1. Industry visits and more practical based projects and applications are incorporated in the curriculum 2. Collaboration with online learning and skill building platforms for job readiness and higher employability is done. 3. Students are encouraged towards research oriented learning. 4. Research Publications are made mandatory for each students 5. Hands on session on state of the art technologies have been introduced. 6. Curriculum was structured and updated based on courses which will improve employability of students
Collaboration with online learning and skill building platforms for job readiness and higher employability is highly recommended.	
Current industry topics like Machine Learning, AI, Industry 4.0, IoT, Cyber Security could be implemented more which help the students in the industry.	
Curriculum of IEM for the course of B.Tech is highly in accordance to latest industrial requirements. Moreover, faculty also promote learning of new academic curriculum.	

During our batch we had only 3 courses. The college prepares us well to crack job interviews and build a structured approach towards problem solving. However, the technology where students spend most of their time was around C / VB / Java. These technologies as standalone are not used extensively these days. Students do feel the need to go for vocational training to up-skill themselves outside the curriculum. The teachers are very knowledgeable about their subjects and can help us get into depth but 6 months is all we have to specialise in something before we move on. 6 months is too short for any coder to completely explore a language especially if those 6 months comprises of tests and other subjects. In my opinion for 1 year a student should work on one technology only (along with the other subjects) with multiple submissions to test knowledge. I say 1 year because trends in technology change very quick so people can explore 4 things in 4 years and the choice of technology should lie with the student

7. More soft skill and personal grooming sessions were included
8. More focus on practical teaching is given, which included hands on lab experiments, mini projects and case study based learning

Prof. Dr. Arun Kumar Bar
Principal
Institute of Engineering & Management
Sector-V, Salt Lake Electronics Complex
Kolkata-700091

Encouragement towards research activities and industry readiness wasn't good during our batch. More attention was given in the students entry time to college or student attends the class or not. If classes are interesting students will automatically attend classes. Better example While lectures should be given. Inclusion of current trends into curriculum is definitely necessary which is implemented as heard. More freedom should be given to the student if he /she wants to go to any competition or perform any research/developmental activities. Lab experiment format may be modified. Copying bunch of theory from a source was a lot a time waste .Focus could have been weather the student actually understood the experiment.

Every student need to be proficient in at least one programming language irrespective of their stream.

Excellent Facilities .

Faculties are good and helpful

Faculties can behave well with the students. Hope it will help

Focus should be more on practical implications of actual concepts.Like how can you make use of data structures and algorithms to solve real life problems in time efficient ways. Students should be encouraged to do more projects.

In a city like Kolkata, where there is enough scope for education system to change the approach towards learning and making someone industry ready, IEM was way ahead in times. During college time, it might have been very disappointing, but now that discipline does play a big role (my first job itself I had to face Loss of Pay if I was late to work :P). I am not really aware how the system and syllabus has changed today, I am sure you all are doing a great job. But there are things which a fresher needs to be aware about and helps them face interviews, if not included, you can use the same - like how to network, how to negotiate on salary, how to plan on an individual career plan and technical experience if possible through online simulations. This can go a long way.

Overall, Thank you for what I am today :)

Infrastructure and faculties need to be improved in the campus and most importantly the placement coordinator need to be change.

Introduce relevant CORE Industry oriented courses and skill development courses like PLC, SCADA, python, Verilog, etc.

Set the standard of Semesters as per standards of ESE and GATE so that preparation of GATE and semester aid each other and ensure quality of engineers.

The teachers and professors are experienced and knowledgeable, so they can teach as per Gate & Ese standard.

Last but not the least bring more Core companies for core branches because most Core branch students cannot sustain IT sector and resign within 1 year which impacts college's Reputation.

Lastly I want my college to set standard and shine ðŸ™ƒ

It has been a pleasure to be part of this institution. It can truly help you shape your career path with career focused mentoring and guidance from teachers.

It will be very helpful for the students if department can have a look on the current industry skill requirement (for example Analytics, Digital Marketing, Some of IT skills).

It would be highly beneficial if enough attention is paid towards the feedback from existing students regarding the existing faculty. They are the direct benefactors of the process. Hope this helps.

More topics should be covered In a Curriculum which are actually important and wanted in the Industry. And the least required topics should be removed.

Not opportunity for Mechanical Engineering students for Core jobs . We are not interested IT jobs . Thank you

Practical knowledge in hardware and software not

Should start adding more case studies in the carriculum

Since the placements irrespective of departments were

Syllabus at our time was not satisfying market trend and

Syllabus is enough for a student to get prepared for all

Syllabus is very much outdated . A lot of unnecessary

Syllabus provides basic requirements upon which career

SYLLABUS SHOULD BE MORE FOCUSED ON DEVELOPING

Teachers are very supportive, friendly and help students

The BBA program is sufficient but I believe, there should

The curriculum is accurate for any student to achieve

The curriculum was very old and very less/no industry

The syllabus is too backdated, provided the recruitment

There should be Updation in Syllabus with latest

This institution will be responsible for whichever height

We need to update our curriculum, and increase

We should work on personal grooming

1) Kindly include more project works into curriculum

1st year is full waste for cse student as there no subject

After going through a particular course student must

As industry plus technology is rapidly changing updated

Being employed in the Network and Cyber Security
