## Safety and Security in College

The Institute of Engineering and Management (IEM) prioritizes the safety and security of its students within the campus premises, ensuring a secure environment conducive to learning and personal growth. The institution employs comprehensive security measures to uphold this commitment. Every corner of the campus is meticulously covered by CCTV surveillance, with the footage being continuously monitored round the clock. The presence of a dedicated security server room further emphasizes the institution's focus on vigilance, where the footage is regularly reviewed and recorded.

This meticulous surveillance not only acts as a deterrent against potential security threats but also enables immediate response to any untoward incidents. By constantly monitoring the campus, IEM ensures that students are safeguarded at all times, fostering a sense of trust and confidence among the campus community. This unwavering dedication to student safety creates a supportive atmosphere, allowing students to focus on their studies and personal development without concerns about their well-being.
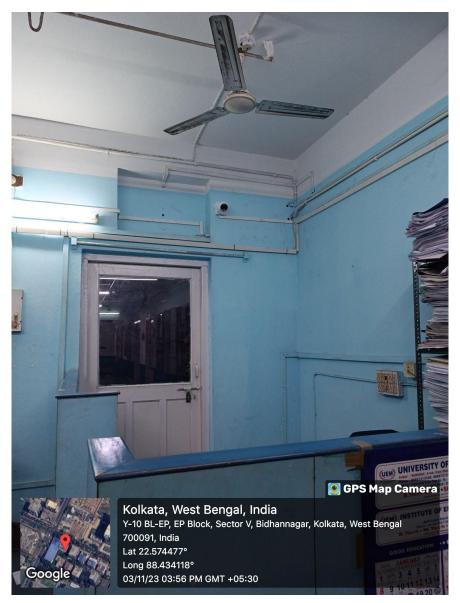

In this secure environment, students can thrive academically and socially, knowing that their safety is paramount. IEM's commitment to providing a safe and healthy campus underscores its mission to nurture a positive educational experience, where students can explore their potential and prepare for a successful future.
