

Tree Plantation is the best activity for making the planet greener, livelier and healthier. Every planted tree helps contain biodiversity and ensures the supply of oxygen for the next generations. Every year, several countries around the world celebrate World Environment Day on 5th June to raise awareness about the impacts human activities make on the environment and how they can be minimized. This year IEM ECE department has celebrated “World Environmental Day “with students and faculty members. Malay Gangopadhyay, HOD of the ECE department, along with students planted small saplings so that they may grow and flourish after some years. Students took part in various Campaigns to make people aware of this day.
