Women's Day Celebration

On the 6th of March 2023, the Institute of Engineering & Management (IEM) radiated an air of empowerment and celebration as it marked International Women's Day with fervour and enthusiasm. The campus buzzed with activities that aimed to honour and recognize the invaluable contributions of women in various fields. The institute took the opportunity to applaud the achievements of its female students, faculty, and staff, acknowledging their resilience and brilliance.

The day commenced with a special assembly, where inspirational women from diverse backgrounds shared their experiences and insights. The institute organised panel discussions, workshops, and seminars covering topics ranging from women in STEM fields to gender equality in the workplace. Students actively participated in these sessions, engaging in thoughtful conversations that aimed to foster a more inclusive and supportive environment.

The highlight of the celebration was an awards ceremony, where outstanding women in the IEM community were recognized for their academic achievements, leadership qualities, and contributions to the community. The day's events concluded with cultural performances and artistic expressions that celebrated the strength and spirit of women.

The International Women's Day celebration at IEM not only acknowledged the progress made in promoting gender equality but also served as a reminder of the importance of continued efforts to create a world where every woman can thrive and succeed.
