Prof. Sandip Singh Sondhi(Dean, Ashram Building) 2. Prof. Dr. Soumya Sen(Assistant Professor, CU) 3. SougataLaha(SAP Labs Germany)

AGENDA TOPICS

Agenda topic *Syllabus Finalization of 2024 Batch* | **Presenter** *Prof.Dr.Rupam Bhattacharya, Prof. NayantaraMitra*
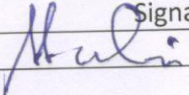

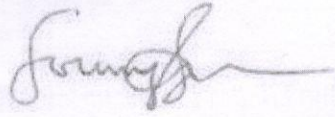

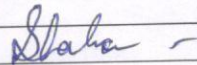

Prof. Dr.Rupam Bhattacharya and Prof. Nayantara Mitra presented the proposed syllabus for the upcoming batch of BCA. The overall impression was good but the following suggestions were given and accepted by all the members present there:

1. In 1st semester all the subjects were perfectly given.
2. In 2nd semester the sequence of the subjects should be changed in the following manner :
   - Data Structures(BCACC201)
   - Object oriented programming (BCACC202)
   - Computer Architecture(BCACC203)
3. In 3rd semester Operating System lab (BCACC392) few parts of Unix should be added.
4. In 4th semester syllabus we need to add front end design in Database Management System lab(BCACC491) and introduce Artificial Intelligence as one of the theory subjects under Computer Science & Application.
5. All specializations were discussed and approved in the meeting.
6. In 5th semester Computer Networks can be added as one of the theory subjects and projects should come under Ability Enhancement.
7. In 6th semester, the subject Unix should be excluded from the syllabus. Instead Computer Vision or Web Technology or IoT as theory subjects and their corresponding Labs can be introduced.
8. In 7th semester NLP should be added instead of keeping it in 6th semester. For Paper Code BCACC702, elective paper options must be given. The subject options can be –
   - NLP, NLP Lab
   - Computer Vision, Computer Vision Lab

- Image Processing
9. In 8th semester the naming convention of projects should be changed.
10. Signatures of Other Members:

Name	Signature
Prof.Dr. Sandip Singh Sondhi	*Sundeep*
Prof. Dr. Soumya Sen	
Mr.Sougata Laha
